

## **Job Description - Tech Intern**

### **About OLX India**

OLX builds advanced trading platforms for buying and selling cars across 10 countries and three continents. A one-stop solution to buying or selling a car, OLX Autos provides safety, convenience, and offers peace of mind for both buyer and seller. OLX Autos operates more than 550 inspection centres across Asia and the Americas, and online trading platforms which reach over 2.4 million buyers every month. To date, OLX Autos has bought, sold, and inspected more than 400,000 cars. OLX Autos is currently active in Argentina, Chile, Colombia, Ecuador, India, Indonesia, Mexico, Pakistan, and Peru. OLX Autos operates under the well-known webuyanycar.com brand in the US.

### **What We Offer:**

- Well paid, full-time internships in the heart of the software industry.
- Exposure to a fast-paced, yet fun, global culture.
- A chance to work with world-class experts on challenging projects.
- Opportunity to provide meaningful contributions to a real system used by customers.
- High level of access to supervisors (manager and mentor), detailed direction, feedback throughout your internship, and a final evaluation.
- Stuff that matters: treated as a member of the OLX team, included in company meetings/activities, flexible hours, casual dress code, catered lunches & candy corner, TT tables, company outings and much more.
- You'll be working with a cross functional pack and QA chapter to shape high quality culture of android/ios/web apps with product and design experts.

### **What We Expect:**

- Desired class level: 3<sup>rd</sup>/4th year Undergraduates.
- Desired majors: Computer Science, Physics, Math, or related field
- Duration: We recommend 1 year .
- Excellent programming skills in any object-oriented language.
- Knowledge of data structures and algorithms.
- Strong problem solving and ability to learn quickly in a dynamic environment.

- Experience with working as a part of a team.
- Dedication and passion for technology.

**What You Will Learn/Gain:**

- How to build reliable, scalable and trustworthy software systems.
- Exposure to Data Management and Data Engineering
- Hands on experience to STLC using SCRUM
- Experience working with cloud infrastructure on AWS, Docker etc

**Your Deliverables**

At the end of your internship, you will deliver the following to OLX:

- A comprehensive project report for each project that you may have worked on, including all product or design documents as per the tasks assigned to you
- A detailed 1 hour final presentation to key stakeholders on the work done during your internship
- Anything else that is identified at the start of the project

**Location: Gurgaon, Haryana**
